DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 1-26 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Computer programs claimed as computer listings per se, i.e., the descriptions or expressions of the programs, are not physical "things." They are neither computer components nor statutory processes, as they are not "acts" being performed. Such claimed computer programs do not define any structural and functional interrelationships between the computer program and other claimed elements of a computer which permit the computer program's functionality to be realized. When the claimed invention taken as a whole is directed to a mere program listing, i.e., to only its description or expression, is it descriptive material per se and hence nonstatutory. Regarding claims 1-8 and 13-26, since a computer program is merely a set of instructions capable of being executed by a computer, the computer program itself is not a process without the computer-readable medium needed to realize the computer program's functionality, as nonstatutory functional descriptive material.

Application/Control Number: 10/699,365 Page 3

Art Unit: 2614

Regarding claims 9-12, the claims recite a data signal embodied in a carrier signal that such signal claims are ineligible for patent protection because they do not fall within any of the four statutory classes of § 101.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 1-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Shastry et al. (U.S. Patent No. 5,511,116).

Regarding claims 1-26, Shastry et al. teach a method of creating and accessing value tables in a telecommunication service creation and execution environment in which the display procedures 300 of FIG. 3 include display and editing modules. The display and editing modules display various graphical objects on the display 240 of workstation 210 and allow manipulation of the graphical objects by the user. The display and editing modules, as shown in FIG. 4A, include Record Control module 321, Node Specification Editing module 322, CPR Editing module 323, GSS Editing module 324, Graph Editing module 325, Variable Editing module 326, Form Creation module 327, Provisioning module 328, Table Node Editing module 339, and Dialog module 329. Record Control module 321 interfaces Database module 340 (FIG. 4C) with each of the editing modules (modules 322, 323, 324, 325, 326, and 339) to transfer data from database 203 to editor buffers (not shown) associated with the respective editing modules in the

99,365 Page 4

workstation 210 and to transfer (save) data from the editor buffers to database 203. Record

Control module 321 also allows a user to prepare a template for a mass market service. CPR

Editing module 323 allows a user to change the characteristics (i.e., headers, entry points) of a

CPR. To do so, CPR Editing module 323 invokes the Graph Editing module 324 and the

Variable Editing module 326 to change corresponding portions of the CPR. The CPR Editing

module 323 also allows editing of existing templates. Graph Editing module 325 allows a user

to manipulate the structure or relationship of nodes and branches in a graph. Thus, in

conjunction with the Node Specification Editing module 322 and Variable Editing module 326,

which allows manipulation of call variables within nodes, the Graph Editing module 325 also

allows graphs to be edited and translates the corresponding internal data structures into graphical

display representations for display on the display 240 of workstation 210. In addition, the Graph

Editing module 324 allows a user to graphically display and edit the structure or relationship of

nodes and branches in a template (Figs 3-7 and 29A-29D).

Conclusion

5. Any response to this action should be mailed to:

Commissioner for Patents

P.O. Box 1450

Alexandria, Virginia 22313-1450

Or faxed to:

(571) 273-8300, (for formal communications intended for entry)

Or:

(571) 273-7490, (for informal or draft communications, please label

"PROPOSED" or "DRAFT")

Hand-delivered responses should be brought to:

Customer Service Window

Art Unit: 2614

Randolph Building 401 Dulany Street Alexandria, VA 22314

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Benny Q. Tieu whose telephone number is 571-272-7490. The examiner can normally be reached on Monday-Friday: 6:30AM - 5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ahmad Matar can be reached on (703) 305-4731. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
